DETAILED ACTION

Summary

Receipt of Applicant's Response and Amended Claims filed on 2/25/08 are acknowledged. Claims 1-10 are pending, and claims 1-2 and 4-10 remain withdrawn. Claim 3 is rejected.

MAINTAINED REJECTIONS

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

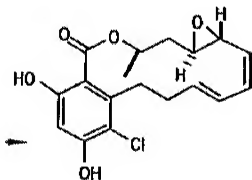

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by US 7,115,651 B2 ('651).

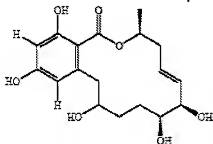

The limitations of claim 3 are taught by '651:

- '651 generically teaches the instant claimed compound in the abstract Formula I, and further teaches specific examples where all the R groups are identical to those instant claimed in Fig. 12-2 (compound 52) a compound:

52

- '651 also teaches a compound (col. 10, lines 35-45):

As such '651 anticipates instant claim 3.

NEW REJECTIONS

Claim Rejections - 35 USC § 103

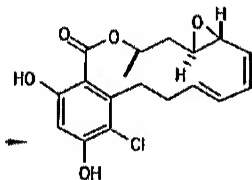

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over US
7,115,651 B2 ('651).

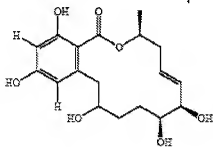

The limitations of claim 3 are taught by '651:

- '651 teach in Fig. 12-2 (compound 52) a compound:

52

- '651 also teaches a compound (col. 10, lines 35-45):

Response to Arguments

Applicant's arguments (2/25/08) with respect to claim 3 have been considered but are not persuasive and are moot in view of the new grounds of rejection necessitated by applicants' amendments. Applicant's amendment to claim 3 overcame the 102 rejection over WO 96/132,256 and as such it is hereby withdrawn. However, the chemical formula as instant claimed is taught by the prior art '651, while the exact stereochemistry positions of R3 and R11 groups are not taught there are only limited options for each R group positions and as such the compound is either anticipated or obvious over '651 which teaches the generic chemical formula structure. As the MPEP 2144.09 states: "Compounds which are position isomers (compounds having the same radicals in physically different positions on the same nucleus) or homologs (compounds differing regularly by the successive addition of the same chemical group, e.g., by -CH₂- groups) are generally of sufficiently close structural similarity that there is a presumed expectation that such compounds possess similar properties." In re Wilder, 563 F.2d 457, 195 USPQ 426 (CCPA 1977). See also In re May, 574 F.2d 1082, 197 USPQ 601 (CCPA 1978) (stereoisomers prima facie obvious). Absent a showing by Applicant that these compounds have different properties, the rejections are hereby maintained. The burden is on Applicant to show that the compounds of '651 are not the same compounds as instant claimed.

Conclusions

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
